

About us

KOLS is a forwarder of import freights of all complexity levels. Existing and regularly updated databases allow for arrangement and delivery in an extremely short time of vehicles of any type: a curtain-sided vehicle, a refrigerated truck or a truck container, that are required for loading. Established relationship with large shipping companies allows for cargo transportation in containers and without them from all ports of the world. Thanks to our close cooperation with foreign companies, we are able to deliver cargo to your warehouse from any point of the world on your order and relieve you of concerns regarding negotiations and delivery organization.

customs clearance agents

LAND TRANSPORT

- Less than truckload (LTL)
cargo carriage
- Full truck loaded (FTL) carriage
in Europe and the CIS countries
- Carriage of dangerous goods (ADR)
by special vehicles
- Outsized cargo transportation
- Container transportation

The most flexible type of transport. It allows for transportation of cargo of different dimensions and weight and delivery of cargo to the exact point of destination. This transportation mode provides for the development a cargo transportation route that is most convenient for a customer. Cargo transportation by land allows for delivery of cargo to any hard-to-reach point on the planet. This task can include not only a self-consistent type of carriage and forwarding services, but also partial multimodal transportation.

SEA TRANSPORT

- Import and export
- Containers of all types
- Full containers
- Partially loaded containers
- Customs clearance
and transit clearance
- Cargo tracking
- Delivery by road or rail,
solutions for transit cargo

KOLS is a carrier that is successfully engaged in cargo transportation by sea. Though KOLS does not have its own ship, it is capable of keeping control over every stage of the transport procedure: from consolidation to warehousing or special services, regardless of how cargo is transported: in containers or otherwise. We cooperate with customs professionals.

AIR TRANSPORT

- Import and export services
- Optimal route planning
- Urgent “express” services
- Logistical door-to-door solutions
- Customs clearance and transit clearance
- Charter carriage

Need to urgently deliver the goods? KOLS can provide an urgent cargo transportation service by air with short reload time and a direct flight to a destination point. In this case prices are higher because high quality services and state-of-the-art standard procedures are applied.

RAIL TRANSPORT

- Professional advice on rail transport
- Ordering wagons and containers
- Selection of an optimal route
and filling in transport documents
- On-line information
about cargo movement
- Filling in transportation documents

Rail transport is one of the best transportation modes RAIL TRANSPORT that do not depend on seasons or weather conditions. Both small and oversized or nonstandard cargo may be transported by rail.

WAREHOUSING

- Customs warehouses
- Preparation of documents
- Cargo sorting, packing, marking, weighing and additional fastening.
- A service of loading cargo in railway wagons is available 24/7 warehousing and loading unloading services
- Preparation of shipping documents on request of a customer

KOLS warehouses are equipped with state-of-the-art loading machinery: from storage battery cars to heavy fork-lift trucks. This machinery allows for handling both very small and oversized and overweight goods. The safety of goods in the surrounding area and inside warehouses is ensured by 24/7 physical security, access control, digital video surveillance and recording systems.

CUSTOMS

- Customs clearance in Lithuania
(import, EX1, Tl, BDK, TIR and CMR)
- Preparation of customs documents
- Customer representation at customs
- Supervision of customs procedures
- Customs clearance consultancy

WANT TO SAVE TIME?

No worries about any customs related procedures because the KOLS team will take care of everything.

OTHER SERVICES

- Carriage of special dangerous goods (ADR)
- Carriage of oversized and overweight cargo by land, sea and rail transport

Oversized cargo carriage is a task that requires special machinery, careful advance planning as well as agreements, permits and specially trained personnel. Being able to optimally match the most appropriate transportation modes, KOLS safely and quickly develops even the most difficult routes.
